

Date: October 29, 2015

To: All GMIAC Subcommittee Chairs and members

Subject: Expanded reporting process

Each of the subcommittees have a unique opportunity based on membership expertise, and information available to them through the GMIAC process. With this opportunity we are requesting the subcommittees produce a brief report concerning the potential impacts they would expect to see in their subject areas with the adoption of MM in Wyoming.

Please focus on the area or areas of expertise specific to your group with a draft available for discussion at our November meeting.
